Russell Street School

Reception - Summer 2- Theme: Sunshine and Sunflowers

Literacy

We are going to be learning about plants and animals in our local environment. We will be comparing fiction and non-fiction books. We will be describing characters from the book, writing instructions and creating leaflets all about gardening.

Mathematics

We will continue to practice counting forwards and backwards, subitising numbers and comparing and ordering numbers. We are going to learn how to double numbers. We will move onto sharing objects equally and linking this with odd and even numbers. We will be working on our problem-solving skills and team work to work on a variety of problems. We will also look at maps and plans and try drawing our own.

Physical Development

In P.E. our focus will be outdoor games, athletic skills and dance. We will develop our fine motor skills through a range of activities including: threading, playdough and cutting. The children will have access to large equipment outside.

Communication and Language

We will be retelling our favourite stories in our own words. We will use non-fiction books to find out information about plants. We will be discussing our own ideas and experiences of gardening and plants.

Sunshine and Sunflowers

Personal, Social and Emotional Development

We will be learning about changes and thinking about how we have changed. We will be thinking about how we are special and beginning our transition into Year 1.

Expressive Arts and Design

We will be exploring a range of artists this half term, looking at the techniques they use in their work. We will use this to create our own piece of art work in the style of our own chosen artist. In music we will be exploring musical instruments, the sounds they make and what they are called.

We will be using our imagination to design and create our own collage gardens. We will have access to modelling and different materials at all times to explore and be creative.

Understanding the World

We will be looking at plants and labelling their different parts. We will be using what we have learnt about plants and gardens to design and create our own mini garden. We will explore different gardens that can be found in our local area and compare them to other gardens we have seen. We will be going on a walk around Stony Stratford to spot signs of summer. We will be looking at different types of plants and flowers on hunts around school and Stony Stratford. We will be learning about the lifecycle of a butterfly and observing our own caterpillars.

	Mathematics	Learning Intention and Success Criteria	Key Vocabulary	Key Skills	Key Knowledge
1	Find my pattern Doubling	I can: Double numbers	Double, twice, same, add	Build doubles using real objects and mathematical equipment Build doubles on ten frames using pair wise pattern	Know that double means twice as many Know the difference between doubles and non-doubles Use ten frames using pair wise pattern to help children to see the doubles. Explore symmetry to recognise doubles
2	Find my pattern Sharing and grouping	I can: Share objects into 2 equal groups I can: Put objects into groups of 2, 3 or 4	Share, equal, fair, group,	Share objects into 2 equal groups. Group objects into groups of 2 and 3.	Build on knowledge of sharing things fairly. Share items equally so that all groups have the same. Recognise and make equal groups. Know that sometimes there are items left over when we share or group
3	Find my pattern Even and odd	I can: Find an even number of objects I can:Find an odd number of objects	Odd, even, pair, group, left over	Sort quantities of objects into odd or even Make a collection of odd and even items Sort Numicon into odd and even	Some objects can be grouped into pairs and some will have some left over. Even numbers can be shared equally into 2 groups, or get into pairs. Odd numbers cannot be shared equally into 2 groups, or get into pairs without one being left over. Recognise odd/even structure on number shapes and by building pair wise patterns on the ten frames. Recognise that if you add one to an odd number it becomes even and if you add one more to an even number it becomes odd. Understand that places and models can be replicated and look different from different positions.
	Spatial reasoning	I can: Describe where items are I can: Follow instructions	next to, on, over, under, into, around, through, behind, between	Follow instructions to build a model Look at objects from different view points- is it the same? What do they notice?	Use positional language to describe where things are in relation to other items.

		I can: Say what is the same, what is different			
4	On the Move Deepening understanding	I can: Solve problems I can: Work as a team	Plan, change, discuss	Solve problems Team work Make adaptations Review strategies	Develop critical thinking skills through extended problem solving
5	On the Move Patterns and relationships	I can: Solve problems I can: Recognise patterns I can: Continue patterns I can: Make my own pattern	Pattern, repeat, copy, continue,	Describe and continue ABBC pattern Compare blocks and rods, how many short blocks is the same as one long block?	Explore and investigate relationships between numbers and shapes Use a widening range of repeating patterns and symmetrical constructions. Look at patterns in stories
6	On the Move Spatial reasoning	I can: Find places on a map I can: Draw a map	Map, plan, view, next to, on, over, between, beside, first, next	Look at a range of maps and plans- talk about what they can see Draw their own map	Know that we can make maps and plans to represent places and use these to see where things are in relation to other things.

Week	Expressive Art & Design (Art)	Learning Intention/ Success Criteria	Key Vocabulary	Key Skills	Key Knowledge
1	Sing the "Busy in the Garden" song. Listen to sunshine-themed songs, such as Walking on Sunshine, Sunshine on a Rainy Day, Here Comes the Sun and You Are the Sunshine of My Life and talk to the children about how the music makes them feel. How would they dance to the music? Play the mirror dancing game.	WALT: perform and move in time with the music	Rhyme Perform	Learn and sing songs and rhymes as part of a larger group.	That music can have a different tempo and beat.
2	Explore artwork made by great artists. Display various pictures of gardens, such as Bauerngarten by Gustav Klimt, The Flowered Garden by Claude Monet, Murnau The Garden II by Wassily Kandinsky or Flower Garden by Emile Nolde. The Royal Academy website has a selection of garden paintings to explore. Invite the children to talk about what they can see in the pictures and which ones they like best. Remind the children of when Errol dreamed of a garden in the story Errol's Garden by Gillian Hibbs. Provide the children with a selection of ready-mixed paint, mixing palettes and brushes. Invite them to paint a dream flower garden using the paintings as inspiration. Create a flower garden gallery with the children's artwork.	WALT: mix colours and talk about my likes and dislikes.	Observe Techniques Media Materials	Explore artwork by famous artists and talk about their likes and dislikes.	Know what an artist does Know about an artist and the techniques they used
3	Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function. Display paint colour charts showing different shades of yellow. Provide large pots of yellow ready-mixed paint, mixing palettes, strips of paper, brushes and small pots of blue, red, white, brown and black ready-mixed paint. Display the question 'How many shades of yellow can you make?'	Create Think of my idea Select materials Choose colours	Inspired Create Primary Secondary	Use primary and other coloured paint and a range of methods of application.	The primary colours are red, yellow and blue.

4	Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function. Provide a range of beads, seeds, petals and lentils in shades of red, yellow and orange. Offer blue paper or card and invite the children to make transient images of the sun. Take photographs of the images.	Design/ Think of my design Select the colours Select the materials	Design Imagination Combining Transient	Use natural materials and loose parts to make 2-D and 3-D art.	Logs, pebbles, sand, mud, clay and other natural materials can be used to make simple 2-D and 3-D forms.
5	Use pictures, interests and experiences to inspire their creations. Explore and create using a wide range of materials and components, including upcycled materials, construction kits, textiles and ingredients. Display the Scarecrow picture card and invite the children to discuss what they think it is and its use. Explain that when seeds are planted, birds like to eat them as food, so people need to scare birds away without hurting them. Display a selection of used CDs and show how they reflect the light as they move. Ask the children how this might help scare birds away. Explain that as the CD spins and the sunlight reflects off, it discourages birds from landing as they are scared by the light. Tell the children that they are going to make a CD mobile to protect their garden. Offer acrylic gems, silver foil, beads, glass pebbles, sequins and glue for the children to add extra sparkle and decoration to their CDs. Thread the finished CDs onto string and use them to create a mobile to hang in the garden.	Design Create design	Reflection Discouragement Protection	Explore significant products. Construct simple structures and models using a range of materials.	Some products are significant because they have changed the way people live their lives.
6	Create collaboratively, share ideas and use a variety of resources to make products inspired by existing products, stories or their own ideas, interests or experiences. Display a range of sun hats and talk about how they help keep us safe in the sun. Explain that they will make sun hats and must think about the different features they would like on their hat. Provide each child with a paper plate. Divide the centre of the plate into eight triangles and show the children how to cut along the lines to the rim of the plate and push them out to make the template for their hat. Display a range of cardboard, fabric, pipe cleaners, tissue paper, felt tip pens, staplers, hole punches, scissors and glue for the children to create	Combine materials/ Select materials Carefully place materials Attach with glue	Create Apply Adhesive Natural	Create collaboratively, share ideas and use a variety of resources to make products inspired by existing products, stories or their own ideas, interests or experiences.	A variety of materials can be used to create an end product.

	their sun hats. Act as a technician to support the children when making their hats. Take pictures of the children wearing their completed hats.				
7	Sing a range of well-known nursery rhymes and songs. Invite the children to choose their favourite songs from the year. These could be nursery rhymes, songs they have learned through projects or songs they have learned in assembly. Make time to sing different songs and ask the children to talk about why they like them. Record the children singing the songs and play the recording back for them to listen.	Sing a variety of songs	Nursery rhyme Record	Sing well-known songs and nursery rhymes in a group or on their own, increasingly matching the pitch and following the melody.	That songs have a different tempo and beat.

Music planning – see Charanga scheme of work.

Week	Understanding the world: The World and People and Communities	Learning Intention/ Success Criteria	Key Vocabulary	Key Skills	Key Knowledge
1	Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter. Arrange a visit to a local public space. Explore the environment and talk about the plants, trees and wildlife that live there. Talk about how the plants are cared for and what they need to grow and survive. Provide each child with a Parks and gardens spotting sheet to encourage them to look for a range of different flora and fauna in the environment. Take photographs of the different areas of the park, the plants and animals that live there and any special features.	Make observations. Look closely Say what you see Compare	Environment Plants Trees Shrubs Flora Fauna	Observe and describe living things and their habitats within the local environment.	A habitat is a place where living things live. Local habitats include woodlands, gardens and ponds. Other habitats include hot places, such as deserts, and cold places, such as the Arctic.
2	Describe their immediate environment using knowledge from observation, discussion, stories, non-fiction texts and maps. Display photographs from the memorable experience. Invite the children to talk about the things they saw and discovered when they visited the park or garden, using the photographs to help. Support the children to put the pictures onto a large sheet of paper to make a photographic map of the park or garden. As you create the map, encourage the children to use positional language to describe where each park area should go. When the photographic map is complete, provide paper, pens and pencils for the children to draw and colour maps of the park or garden if they choose.	Use positional language. Design maps	Position Next to Behind Near In front of	Make and use simple maps in their play to represent places and journeys, real and imagined.	A map is a picture or drawing of an area of land or sea.
3	Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter. Display photographs of the local environment throughout the year. Invite the children to talk about changes during each season, including the weather, plants and animals. Display the Seasons picture cards and ask the children to sort the pictures into the appropriate season. Support children with the	Identify the different seasons.	Season Change Weather Temperature Spring Summer Autumn Winter	Notice and begin to describe patterns of weather in summer and winter.	The weather can change throughout the day, week and month. The weather is different at different times in the year.

	grouping activity. When they have grouped the pictures, ask the children to choose a picture to talk about. Encourage them to say what is happening in the picture, what season it belongs to and how they know.				
4	Explore the natural world around them, making observations and drawing pictures of animals and plants. Display the Flower picture cards and offer a range of wild or garden flowers and various magnifiers for close observation. Provide children with the Parts of a plant picture cards to help the children identify the plants' parts they can see. Encourage them to talk about the flowers and their similarities and differences. Explain that flowers are often brightly coloured to attract insects, who spread pollen to other flowers, helping to grow new plants. Provide paper and colouring pencils for the children to draw one of the flowers and label the different parts. Visit the Gardeners World website.	Make observations/ Look closely Say what you see Compare	Observe Similar Same Different	Begin to name and group plants and trees according to their observable features.	Plants and trees are living things. They can be identified according to their features, such as leaves, seeds and flowers.
5	Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter. Provide a kit to raise butterflies and introduce the children to their life cycle. Display the kit with hand lenses, cameras or tablets and little books for the children to record the changes as they happen. Share <i>How Does a Butterfly Grow?</i> by RHS with the children and encourage them to ask questions as you explore the book together.	Make observations	Egg Caterpillar Chrysalis Cocoon Butterfly Change Metamorphosis	Explore the natural world around them and give simple descriptions, following observation, of changes.	Living things change over time. This includes growth and decay.
6	Explore the natural world around them, making observations and drawing pictures of animals and plants. Display the Sunflowers picture cards and encourage the children to describe how the plants look. Talk about the different parts of the plant. Share the book I Can Grow a Sunflower by RHS. Explain that sunflowers grow tall and that you are going to have a sunflower growing competition. Offer the children packets of sunflower seeds, compost, pots and trowels. Read the instructions with the children and plant the seeds. Encourage them to explain how they will care for their sunflower, so it grows tall and strong.	Describe Follow instructions	Stem Flower Leaf Petal Stamen Roots	Name and describe basic features of plants and trees.	A sunflower is a type of plant. Parts of a plant include the roots, stem, leaves, flowers and petals. Plants need air, sunlight, warmth, water and

7	Explore the natural world around them, making observations and drawing pictures of animals and plants Memorable experience: Arrange a visit to a local farm where the children can observe the animals that live there, discover which crops are grown and find out about the machines that help farmers do their work. Give the children time to notice the sights, sounds and smells of the farm. Before the visit, find out questions the children would like to ask. Take photographs of the children during the visit to create a photobook.	Observe	Habitat Woodland Pond Tractor Animal names	Observe and describe living things and their habitats within the local environment.	nutrients from soil to grow. A habitat is a place where living things live. Local habitats include woodlands, gardens and ponds. Other habitats include hot places, such as deserts, and cold places, such as the Arctic. A farm is an area of land and its buildings used for growing crops and rearing animals.
8	Explore the natural world around them, making observations and drawing pictures of animals and plants. Take the children on a scavenger hunt in the school grounds. Before you go, invite the children to choose a friend to work with. Provide each pair with the Scavenger hunt cut outs a basket to collect objects and a tablet or camera to record their finds. Part of the hunt asks the children to look for textured objects. Read the sentences with the children and introduce them to the vocabulary to check that they understand what they are looking for. When the children return, invite them to share what they found. Compare the pictures and objects and talk about the objects' similarities and differences.	Compare	Wet Dry Hard Soft Rough Smooth Spiky Wavy	With support, observe, record and talk about materials and living things.	Objects, materials and living things can be looked at and compared.

NB. In addition, fine motor skills are taught and practised in Expressive Arts & Design, English, Handwriting and specific activities available in continuous provision (inside & outside). Gross motor skills also developed daily, through use of the large outdoor equipment.

Health and Self-care taught and supported daily through circle times, meal times and books. Parents encouraged to help children to develop self-care skills at home, as communicated through weekly parent updates.

NB. In addition, daily circles, daily 'check-in', support to develop friendships, restorative practice and turn taking games.

Week	Communication and Language	Learning	Key Vocabulary	Key Skills	Key Knowledge
		Intention/ Success Criteria		EAN G	MOMEDIE
1	Offer explanations for why things might happen, making use of recently introduced vocabulary from stories, non-fiction, rhymes and poems when appropriate Arrange a walk in your local environment or visit a local park. During the walk, talk about how the environment has changed throughout the year and point out how the trees have changed and look at the flowers that are blooming. Explain that the local environment is home to lots of living things, including plants and trees, and see if they can spot any animals, such as bumblebees, butterflies or ladybirds. Provide each child with a container to collect 'treasures' on their walk. Take lots of pictures of the children during the walk.	Talk about change.	Environment Change Bloom	Begin to observe and talk about living things in the local environment.	A habitat is a place where living things live. Living things, including plants and animals, live in the local environment.
2	Express their ideas and feelings about their experiences using full sentences, including use of past, present and future tenses and making use of conjunctions, with modelling and support from their teacher. Display the Outdoor fun picture cards. Invite the children to discuss what is happening in the pictures and encourage them to talk about activities they enjoy outside. Provide opportunities for each child to share their thoughts and ideas and encourage them to listen to each other. Provide paper and pens for the children to draw a picture of them doing their favourite outdoor activity. Offer sound mats and word banks to add labels and sentences to their picture if they choose.	Express our ideas	Activity Opportunity	Articulate their ideas and thoughts in well-formed sentences and describe events using some detail.	How to write a sentence.
3	Offer explanations for why things might happen, making use of recently introduced vocabulary from stories, non-fiction, rhymes and poems when appropriate. Display white carnations or celery sticks with leaves. Invite the children to talk about what would happen to the plants if they didn't have any water. Then ask how they think the plants take in water. When the children have had the chance to discuss their ideas, explain that plants draw water through their roots, which travels up their stems and into the leaves and petals. Provide clear plastic cups containing red, yellow and blue food colouring, diluted with water. Add a stick of celery or a white carnation to each cup. Ask the children what they think might happen to the celery or flowers. Provide magnifying glasses for the children to observe the changes throughout the day and during the following days, and take photos at different points to record the changes. Subsequently, challenge the children to use what they have	Explain occurrences	Roots Leaves Petals	Represent scientific observations by mark making, drawing or creating simple charts and tables. Offer explanations for why things happen, making use of vocabulary, such as, because, then and next.	Plants draw up water through their roots.

	observed to try different colours. Offer paper, pens and pencils for the				
	children to draw the celery or carnations if they choose.				
4	Hold conversation when engaged in back-and-forth exchanges with their	Use new	Florist	Learn new vocabulary	Florists sell flowers.

	Hold conversation when engaged in back-and-forth exchanges with their teacher and peers.	play.		the day in small group discussions and during play activities.	to wrap flowers.
	Offer explanations for why things might happen, making use of recently introduced vocabulary from stories, non-fiction, rhymes and poems when appropriate.				
	Set up a florists' role play area using the <u>Florist display banner</u> and <u>Florist picture cards</u> . Provide a till, notepads, pens, phones, toy money, buckets, artificial flowers, tissue paper, brown paper, cellophane, ribbon and string. Model how to use the materials to order and buy flowers, write messages, wrap and deliver.				
	The children can make flowers using tissue paper and art straws. This activity is great for developing children's maths skills, and it also provides a great opportunity for developing language and writing.				
5	Hold conversation when engaged in back-and-forth exchanges with their teacher and peers. Use and understand recently introduced vocabulary during discussions about stories, non-fiction, rhymes and poems and during role-play. Enjoys looking at books and sharing stories. Create a perfume-making station in a Tuff Tub. Provide boxes of flower petals, grass clippings, herbs, pestle and mortar, funnels, pipettes, water and small clear plastic bottles. Offer labels and pens for the children to name their scents and clipboards and paper to write the recipes.	Use new vocabulary in our play.	Perfume Scent Pestle Mortar Funnel Pipette	Show an understanding of the meanings of new words by using them in discussion and role play situations.	Perfume can be made using flowers and water. A recipe is something you use for making things eg perfumes and food.
6	Make comments about what they have heard and ask questions to clarify their understanding. Display slices of various summer fruits, including strawberries, watermelon, orange and peach in zip-lock bags for the children to investigate by touch or observation. Put slices of the same fruits in sealed plastic pots. Punch holes in the top of the pots and ask children to smell through the holes and identify the fruits.	Ask questions	Sense Smell Touch Look Who What Why When	Ask a relevant scientific question to find out more, explain how things work and why they might happen.	Question words include who why, what, when, where and how.
